We connect and protect

Secure Dual W-Lock Power Cord

Data Solutions

Secure dual W-Lock power cords provide enhanced cord retention between both the PDU and IT equipment. Both connections require deliberate action in order to release the locking buttons to prevent accidental detachment of power connections. Cords function with any corresponding standard IEC receptacle, but locking feature requires compatible W-lock or V-lock outlets

FEATURES

- Secure dual locking power cords
- The IEC C14/C20 plug will lock into any RackPower PDU
- The universal locking IEC connector will securely lock into any standard C14/C20 power inlet
- Both connections require deliberate action in order to release the locking buttons and disconnect power
