

Rail Coach Screw Kit

nVent ERICO has developed a cost-effective system for quickly and effectively removing a broken screw spike in a concrete rail tie. Spike breaks normally occur in the tie insert and under the tie plate, which traditionally requires an expensive and time-consuming removal process. The Coach Screw Kit includes the components needed to initiate the reaction, thereby simplifying and expediting the extraction process.

VLASTNOSTI

Effectively removes broken screw spikes in concrete rail ties

For use with commonly used concrete tie screw spikes

Convenient kit includes nVent ERICO Cadweld mold, handle clamp and control unit to initiate the reaction

nVent ERICO Cadweld Plus Welding Material is required for the process
