

Seismic Kit Zone 4, SBK-Z4

Kit for seismic zones. The SBK-Z4 reinforces the enclosure's frame, adding rigidity at the back and onto the side with its cross bar design, enabling the enclosure to withstand vibrations with accelerations up to 1.6 g in all directions. This meets all requirements for Telcordia GR-63-CORE, Zone 4.

FUNKTIONER

Description: Reinforcement Kit to be added to standard MCS enclosures in order to reach a Seismic Zone 4 rating.

Braces: 2 X shaped braces, of 12ga galvanized steel, which provides resistance to the frame going out of square.

Side Plate: which adds rigidity and strength as well as extra mounting surface for components.

Corners: 4 total corner brackets, of 10ga galvanized steel, which make the weld joints of the frame more robust.

Door Pin: Mounted onto the door bars, it locks into a hole in the corner bracket, which prevents the door from jumping out of its lock catchers in an earthquake event.

Pack Qty: 1 Assembly per order.

Mounting Requirement: Complete assembly with SPM Side panels, but mounted with seismic hardware included in SBK Kit delivery.

If Plinth is required, PSB-Z4 needs to be ordered separately.

SPECIFIKATIONER

Materiale: Galvaniseret Stål

Kompatibel kabinetsbredde: 600mm min
