

FT02 Female Standard Coupler

The nVent LENTON Ultimate FT02 Female Standard Coupler is designed for high performance applications, efficiently creating mechanical reinforcing bar connections where the second bar can be rotated and is not restricted in its axial direction. The LENTON self-aligning, taper-thread reduces misalignment issues and helps eliminate cross-threading during installation. The FT02 Female Standard Coupler is used in conjunction with the nVent LENTON Ultimate MT02 Male Taper Stud for bar-to-bar connections.

Additionally, the FT02 Standard Coupler can be used in High Cycle Fatigue applications and exceeds BS 8597 performance requirements with BS 4449 grades B500 B and C reinforcing bar. Contact your LENTON representative for more information.

Typical applications include column bar splicing (shearwalls, corewalls), beam bar splicing, future extension and segmental pours.

FUNKTIONER

Installs quickly and easily

Utilizes the standard nVent LENTON taper profile

Designed to splice the same diameter bars where the second bar can be rotated and is not restricted in its axial direction

No special tools or skills required

SPECIFIKATIONER

YDERLIGERE PRODUKTOPLYSNINGER

Bar dimensions and weights listed may vary by region. Coupler sizes not shown may be available by special order. Contact your nVent LENTON representative for more information.
