

MT02 Male Taper Stud

The nVent LENTON Ultimate MT02 Male Taper Stud is designed for high performance applications, efficiently creating mechanical reinforcing bar connections. The LENTON self-aligning taper-thread reduces misalignment issues and helps eliminate cross-threading during installation. The MT02 Male Taper Stud is used in conjunction with the nVent LENTON Ultimate FT02 Female Standard Coupler for bar-to-bar connections, and the nVent LENTON Ultimate PM09 Female Position Assembly for position/caging connections.

Additionally, the MT02 Male Taper Stud can be used in High Cycle Fatigue applications and exceeds BS 8597 performance requirements with BS 4449 grades B500 B and C reinforcing bar. Contact your nVent LENTON representative for more information.

FUNKTIONER

Installs quickly and easily

Utilizes the standard nVent LENTON taper profile

No special tools or skills required

SPECIFIKATIONER

YDERLIGERE PRODUKTOPLYSNINGER
