

EuropacPRO Rear Hood for Stainless Steel EMC Gasket

Power Utilities

The rear hood is used as a shielded rear boundary and requires 60 mm space. Therefore if the rear hood is used, the side panel depth must be 60 mm greater than the board depth. Contact between the rear hood and the horizontal rails is established by the stainless steel contact strip for the cover plate. Thus no additional EMC sealing is necessary. Rear hood cannot be used simultaneously with rear corner profile.

CERTIFICERINGER

FUNKTIONER

The rear hood is used as a shielded rear boundary. The rear hood requires 60 mm space. Therefore if the rear hood is used, the side panel depth must be 60 mm greater than the board depth. Example: For a board depth of 160 mm a side panel (with rear hood) of 235 mm (175 mm + 60 mm) is used

Contact between the rear hood and the horizontal rails is established by the stainless steel contact strip for the cover plate. Thus no additional EMC sealing is necessary

Rear hood cannot be used simultaneously with rear corner profile

For EMC-shielding please order EMC gasket for horizontal rail separately.
