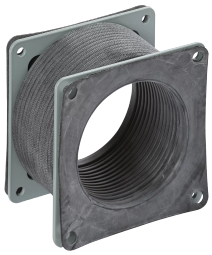
We connect and protect

Flexible Fitting Feed-Through



Feed-Through Flexible Fittings are used for isolating a wireway run from shock and vibration or compensating for misalignment. Used where an odd angle is required (but not to exceed 90 degrees). Permits movement of a machine or control station connected to a wireway run. Hypalon bellow with steel flanges. Connects to other wireway sections and fittings and protects wires and cables against dust in a broad range of industrial applications.

FEATURES

- Feed-Through Flexible Fittings are used for isolating a wireway run from shock and vibration or compensating for misalignment
- Used where an odd angle is required (but not to exceed 90 degrees)
- Permits movement of a machine or control station connected to a wireway run
- Hypalon bellow with steel flanges
- Connects to other wireway sections and fittings and protects wires and cables against dust in a broad range of industrial applications
