

# P14 Position Coupler for Cryogenic Applications

The nVent LENTON brand of cryogenic reinforcement splicing systems should be specified whenever cryogenic-grade reinforcing bar is used, or during normal operating or emergency conditions where the temperature falls below - 20 °C (-4 °F). By combining the nVent LENTON taper-threaded couplers with state-of-the-art materials, we have developed one of the slimmest couplers on the market, while still maintaining top performance. Typical construction projects include LNG and LPG storage tanks.

#### **FEATURES**

Designed to splice the same diameter bars

Designed to splice two curved, bent or straight bars, when neither bar can be rotated and where the ongoing bar is free to move in its axial direction

Improved performance and reliability at cryogenic temperatures (-168 °C / -270 °F)

# **SPECIFICATIONS**

Finish: Plain

Material: Stainless Steel 431 (EN 1.4057)
