

Cable Entry Gland Plate Connected Grommet Large, CCFGL

CCFG grommets are used together with the CCFI and CCFO cable entry systems. The tapered shape of the grommet makes it easy to press in the grommet. The wave-cut profile makes them easy to install and ensures a tight fit around the individual cables.

INDUSTRY STANDARDS

UL 508A Component Recognized; Type 1, 12, 4X (indoor only); File No. E61997

UL94 V-0 Flammability

NEMA Type 1, 12, 4X (indoor only)

CE

IP66

FEATURES

Finish: Gray

Pack quantity: 10

Description: The CCFG system is available in two sizes: small and large. The conical shape of the grommets allows them to be easily pressed in and provides static strain relief in accordance with DIN EN 62444. For assembly, they are pressed from the inside out into the openings of the assembled inlays. The grommets are available in two different sizes to match the diameter of the cable. The CCFG is first placed around the cable and then inserted into the cable gland. Thanks to the wave-cut profile, there is no need to remove the connector on the assembled cabled.

Temperature resistance: -40°C to +90°C

Flammability: UL94 V-0

Protection: IP66, NEMA 1, 4x, 12 (Indoor use only)

Material: TPE

Large Grommets available with different hole sizes to match cable diameter

Grommet is placed around cable and then inserted into cable gland
