

BSA Self-Regulating Heating Cable

nVent RAYCHEM BSA self-regulating trace heating cables are an ideal solution for freeze protection of pipes and vessels and for process temperature maintenance, in non-hazardous industrial locations, without steam-cleaning requirement. They maintain process temperatures up to 65°C and can withstand intermittent exposure temperatures up to 85°C. BSA heating cables use the same heating core and polyolefin inner jacket as the BTV. The earth path consists of an aluminum foil wrap and metallic drain wires, providing 100% electrical protection coverage. The polyolefin outer jacket is suitable for mild inorganic solutions and provides excellent protection.

FEATURES

Foil wrap /drain-wire construction and modified polyolefin jackets provide a highly flexible cable

The unique construction allows stripping the jackets in no time, for fast connection

100% electrical earth path coverage for ultimate safety

Reliable long life performance with a 10 year product warranty available

SPECIFICATIONS

Supply Voltage: 0 - 230 V

Ground Path Type: Foil and Drainwire **Conductor Material:** Nickel-Plated Copper

Area Classification: Non-Hazardous

Outer Jacket Material: Polyolefin

Table 1/1					
Catalog Number	Item Name	Nominal Power Output @ 10°C, 230V	Max Circuit Length	Nominal Width	Nominal Thickness
P000002271	3BSA2-DR	10 W/m	150 m	13.7 mm	6.2 mm
P000002272	7BSA2-DR	23 W/m	120 m	13.7 mm	6.2 mm

WARNING

nVent products shall be installed and used only as indicated in nVent's product instruction sheets and training materials. Instruction sheets are available at www.nvent.com and from your nVent customer service representative. Improper installation, misuse, misapplication or other failure to completely follow nVent's instructions and warnings may cause product malfunction, property damage, serious bodily injury and death and/or void your warranty.
