

920 Series, Operator Console

nVent RAYCHEM 920 Series - Operator Console is a simple interface for the 920 Series controller, with LED displays and function keys to make it easy to program and operate. It allows you to test or monitor the heat tracing, examine or alter the configuration and look at or reset alarms. No additional handheld programming devices are needed. Settings are stored in nonvolatile memory in the event of power failure.

FEATURES

- Simple to program and operate
- Provides access to all monitored parameters, programmed values and alarm information
- Permanent or temporary for display/setup during maintenance: can be installed or removed under power even in hazardous areas
- Password protection, to provide enhanced field security
