

P13 Position Coupler, Stainless Steel, Worldwide Design

Stainless steel couplers are specified whenever corrosive environmental conditions combine with the need for high load-bearing strength. nVent LENTON stainless steel couplers are commonly used when the construction materials may come into contact with de-icing salts, salt water or marine environments. Typical applications include bridges and bridge decks.

FEATURES

Designed to splice the same diameter bars

Designed to splice two curved, bent or straight bars, when neither bar can be rotated and where the ongoing bar is NOT free to move in its axial direction

Adjustability in the female end of the coupler allows the coupler to extend out to meet the taper-threaded reinforcing bar

Duplex 2205 stainless steel provides a unique combination of strength and corrossion resistance

SPECIFICATIONS

Table 1/3								
Catalog Number	Material	Finish	Design Version	Coupler Adjustment	Rebar Size, Metric	Rebar Size, US		
EL20P13LSSN	Stainless Steel Duplex 2205 (EN 1.4462)	Plain	Worldwide (Globally Available Materials)	Standard	20 mm	#6		

Table 2/3							
Catalog Number	Rebar Size, Canada	Diameter (Ø)	Length 1 (L1)	Length 2 (L2)	Bar Depth (BD)	Bar Gap 1 (BG1)	
EL20P13LSSN	20M	35 mm	199 mm	260 mm	35mm	129mm
