

Alarm Beacon sensors

Data Solutions

Alarm Beacon sensors are accessories attached to nVent Enlogic iPDUs, which are designed to create a visible alarm notification for an alert condition (or other userdefined situation) in an effort to notify IT personnel quickly and efficiently. They provide information via Web UI, SNMP, CLI/SSH interfaces.

FEATURES

These devices produce visual alerts that direct users' attention to a designated area

The beacon is attached to an iPDU's sensor port 1 or port 2, and it flashes a red LED for 0.5 secs ON/0.5 secs OFF rhythmically until the issue is fixed or warnings are resolved

A standard RJ-45 connector may be used to extend the Alarm Beacon up to a distance of 30.5 meters

SPECIFICATIONS

Table 1/2

Catalog Number	Depth	Height	Package Quantity	Plug Type	Removable Input Cable	Weight
EA9101	300mm	98mm	1	RJ45	No	0.5kg

Table 2/2

Catalog Number	Width
EA9101	100mm

ADDITIONAL PRODUCT DETAILS

Includes: (5) Cable Ties, (1) RJ45 Quick Disconnect Coupler, (5) Adhesive Backed Mounts, (1) 1.8m standard ethernet extension cable
