

# nVent LENTON Interlok Position Grout-Fill Coupler

## FEATURES

Designed to splice the same diameter bars

Smaller bars can be installed into the over-sized cavity end if required

Positional feature allows the threaded coupler end to telescope out to close a gap between forms and to allow alignment of the grout tubes

Over-sized cavity allows for greater field tolerance

Taper-threaded end helps prevent movement of the reinforcing bars and eliminate misalignment

Requires less grout than most competitive systems
