

# Foam Rubber Pad

The Vibration Isolation Pad line from nVent CADDY is designed to reduce noise, dampen vibrations, and stabilize equipment. These pads serve various purposes—from isolating machinery to enhancing audio quality—and are typically used on stiff, supporting structures with mid-to-high frequency vibration sources. The pads can be placed beneath machinery and equipment to provide reinforcement and durability while minimizing noise and vibration and are offered in multiple surface formats to meet unique application needs.

## FEATURES

Used to support pumps, motors, air conditioning units and generators

Designed for outdoor use where high resistance to water, oil and other damaging substances is required

Free from chlorine, halogens, formaldehydes, CFC's, HCFC's and phthalates

Flame-resistant due to closed cell construction

## SPECIFICATIONS

Table 1/1

Catalog Number	Article Number	Length	Width	Height	Ultimate Static Load
