

Swivel Tilt for Pedestal

A swivel and tilt mechanism provides an easy way to rotate and tilt an HMI enclosure to a convenient operating position. It is designed for use between the bottom of an HMI enclosure and a pedestal (enclosure reinforcement may be required). Tilt lock has a large release knob that allows quick incremental adjustment. Swivel can be locked in any position for safe operation. A large center opening accommodates control cables that have attached plugs.

FEATURES

Tilt allows forward and backward movement up to 30 degrees from horizontal

Swivel allows 350-degree maximum rotation

Integral stops at 30-degree increments between 60 degrees and 180 degrees of rotation

Hardware and gasket to attach enclosure are included

Do not use the swivel between an overhead support and an enclosure
