

# Cable to Cable, Heavy Duty, TA, #2 Solid, 4/0 Concentric

## Data Solutions

### CATALOG NUMBER

**HDTAC1T2Q**

Heavy duty connections were originally developed to be used on reclaimed cable. The heavy duty connections use a larger size connection cavity in the mold and a larger size welding material than the equivalent standard duty connection.

The larger size welding material supplies extra BTU's to melt the heavy oxide coating on the conductor and to overcome some severe field conditions. Heavy duty connections eliminate cutting the run conductor on certain types of connections, reduce cable cleaning requirements for old or reclaimed cable, and increase reliability under adverse field conditions.

Heavy duty connections are increasingly being specified for copper-coated steel conductor connections.

### CERTIFICATIONS

### FEATURES

Forms a permanent, low resistance connection

Provides a molecular bond

nVent ERICO Cadweld Exothermic Connections are rated with the same current capacity as the conductor

Portable installation equipment with no external source of power required

Installers can be easily trained to make nVent ERICO Cadweld Exothermic Connections

Connections can be visually inspected

PRODUCT ATTRIBUTES

|                                                      |
|------------------------------------------------------|
| Mold Family: TA Mold Family                          |
| Conductor 1: #2 Solid                                |
| Conductor 1 Outer Diameter, Nominal: 6.53mm          |
| Conductor 2: 4/0 Concentric                          |
| Conductor 2 Outer Diameter, Nominal: 13.41mm         |
| Mold Split: Horizontal                               |
| Split Crucible: No                                   |
| Wear Plates: No                                      |
| Mold Only: No                                        |
| Welding Material: 115 or 115PLUSF20, Sold Separately |
| Handle Clamp: L160, Sold Separately                  |
| Price Key: C                                         |
| Ease of Use: Preferred                               |

ADDITIONAL PRODUCT DETAILS

For applications such as computer room, tunnel or other low-ventilation areas, specify a smokeless nVent ERICO Cadweld Exolon mold. Add an XL prefix to the standard mold part number when ordering (for example, a TAC2Q2Q becomes XLTAC2Q2Q). Similarly, nVent ERICO Cadweld Exolon welding material is also designated by the XL prefix (for example, 150 becomes XL150).

A gap between conductors may be required. See mold tag for more information.
