

ESE Tester, I Series

The nVent ERICO Early Streamer Emission (ESE) Tester, I Series is designed to rapidly test the integrity of all nVent ERICO System 1000 ESE Terminals, SIXXi models. Easily identifiable, color coded test results are displayed within the self-contained tester operating on a standard 9-volt battery. In case of battery failure, an intermittent signal is displayed to indicated a required battery change—preventing downtime and costly outages. When paired with the nVent ERICO ESE Tester Telescopic Pole, you can reach ESE Air Terminal up to 10m in height.

FEATURES

Lightweight and portable

Handheld testing unit quickly gauges ESE Air Terminal's circuit with impulses

Color-coded conductor cables for connecting to the ESE Air Terminal

Contains two Alligator clips for a secure fit to ESE Air Terminal

Flashing, color-coded LED notifications to indicate ESE Air Terminal test results

LED screen indicates battery health and provides replacement reminders

Response time of approximately six seconds for a stabilized measurement

Extremely simple to operate: connect, press, hold, read

Includes a hard carrying case for further protection

SPECIFICATIONS

WARNING

nVent products shall be installed and used only as indicated in nVent's product instruction sheets and training materials. Instruction sheets are available at www.nvent.com and from your nVent customer service representative. Improper installation, misuse, misapplication or other failure to completely follow nVent's instructions and warnings may cause product malfunction, property damage, serious bodily injury and death and/or void your warranty.
