

ProLine G2 Caster Kit, Light Gray, Polyamide/Steel

CATALOG NUMBER

P2ACK

The Plate Caster Kit consists of four polyamide casters (two locking and two non-locking) secured to formed-steel plates painted RAL 7035. The Plate Caster hardware secures the caster at the frame corners, and can be used with a bottom-mounted Gland Plate or a 0-mm Solid Base; they however do not work with Plinth Bases. Plate Casters can also be used on joined ProLine G2 enclosures, with no caster swivel interference. Casters are rated to 3000 lbs. (1361 kg). Exercise caution when moving enclosures with casters: avoid adverse floor conditions such as cracks, seams, displacement, etc. Never use casters while transporting an enclosure by truck on roadways.

FEATURES

Kit includes four polyamide casters (two locking and two non-locking)

Can be used with a bottom-mounted Gland Plate or a 0-mm Solid Base; but not with plinth bases

Hardware included
