

Simple Protection Cables Entry For Wall Mounted Enclosures, CES

The rubber cable gland is easy to mount, and cables and pipes can be pulled through at an angle easily without tools, ensuring that the enclosure's protection degree is maintained.

FEATURES

Description: Simple grommet manufactured in a rubber-like material. The installation does not require tools. The “pushout” membrane is a permanent seal until it is penetrated by a cable or pipe. It is equipped with a sock that closes tight around the cable and allows for it to be moved around like a “joy-stick” in the opening without endangering the IP, so it works extremely well with cables passing through at an angle. Suitable for holes in materials of 0.5 to 4.5 mm thickness.

Material: TPE (thermoplastic elastomer), halogen free.

Temperature resistance: -50 °C to +125 °C.

Finish: RAL 7035.

Protection: IP 67.
