

Panel Support Kit

Panel Support Kits provide additional support for panels on which heavy components are mounted. Each panel support fits over a collar stud and is then adjusted so the weight of the panel is partially supported by the bottom of the enclosure. Locknuts prevent accidental change in adjustment. A polyethylene-covered foot on each panel support distributes the panel weight and prevents damage to the interior finish.

FEATURES

Each kit includes two adjustable panel support brackets

APS3 is for One-Door or Two-Door enclosures where distance from bottom of panel to bottom of enclosure is less than 2.25-in. (57-mm)

APS9 is for Free-stand or Multi-Door enclosure where distance from bottom of panel to bottom of enclosure is between 2.88-in. (73-mm) and 8.50-in. (216mm).

SPECIFICATIONS

Material: Mild Steel
Finish: Powder Coated
Color: White
