

# Ballistics Protection

## Keep Critical Equipment Safe

Add UL-rated bullet-resistant materials to the structural-steel framework of any nVent TRACHTE building while maintaining energy efficiency, thermal performance, and resistance to water intrusions.

### Building Features:

- Ballistics protection up to UL 752 Level-8
- Protection is applied to exterior walls, doors, hardware and building penetrations.
- Same interior and exterior materials and finish options.
- Ballistics protection is invisible from the interior or exterior.

### Optional Security Products:

- Electromagnetic Pulse (EMP) Hardened Technology
- Specialty security door designs and hardware.
- Electric door strikes and door alarms.
- Interior occupancy sensors and exterior motion lighting.
- Provisions for customer-supplied security, camera, and card reader systems.

Our solutions add resiliency to critical systems with added protection from natural and human made disruptions.
