

Micro Data Center Solution

PRECISION IMMERSION COOLING

INNOVATIVE CHASSIS-LEVEL PRECISION IMMERSION COOLING TECHNOLOGY

With rising chip and rack densities, pressures to increase energy efficiency, space constraints, water usage restrictions and harsh edge environments, organizations need innovative cooling solutions. To meet this growing special need, nVent, a global leader in electrical connection and protection solutions, is working with Iceotope, a global leader in precision immersion cooling, to offer innovative plug-and-go, best-in-class solutions for data center, edge and high-performance computing (HPC) applications.
