

RIM Roof Ice Melt System

RIM system consists of RIM panels that use high wattage self-regulating cable providing high power output required for heavy snow load areas. RIM system mechanically protects the heating cable, is permanently attached to the roof using screws, provides continuous ice free roof edges and is aesthetically pleasing. RIM panels are specifically designed for eaves, valleys, channels, rakes and flat roof sections. A complete RIM System consists of connection kits, accessories and control systems. In addition, a completely engineered turnkey solution is available to meet your specific roof and gutter de-icing requirements.

FEATURES

High performing, aesthetically elegant roof de-icing solution

For all building types

Mechanical cable protection

Available in various colors

Standard and custom options

Advanced control options

Suitable for all snow load area

SPECIFICATIONS

WARNING

nVent products shall be installed and used only as indicated in nVent's product instruction sheets and training materials.
