

Modular Site-Built Building Solutions

Flexible design adjusts to site conditions.

Ideal for remote locations, difficult-to-access sites, interior or underground applications, platform/mezzanine mounting, and other applications.

FLEXIBLE DESIGN

Material-Only Kits and Site-Built Solutions

- Designed according to final site location
- Alternative to factory-assembled prefabricated buildings
- Complete interlocking structural framework
- Galvanized steel wall panels
- Foundation, skid or platform mounting

Pre-Packaged For Site Delivery

- Panelized and palletized for shipping
- Constructed by field erection crews
- On-site assembly requires no expensive equipment to erect your building
- On-site support services include offloading, setting and commissioning
- Option to perform field wiring and electrical equipment integration

Industry Applications

- Commercial/Industrial
- Oil & Gas
- Power Utility
- Pumphouses/Petrochemical
