12. Description of Equipment:

General – Raychem XTV/XTVR-CT family of parallel self-regulating heating cables provide solutions for industrial freeze protection and process temperature maintenance applications with high maximum continuous exposure temperature. The heating cables can withstand temperature up to 250°C and the maximum continuous operating temperature of +150°C. Minimum installation temperature is -60°C. The cables have a minimum braid density of 70%, a minimum bend radius of ½" (12.7 mm) at -60°C and a voltage rating of 90-130 VAC and 190-277 VAC

Construction – The XTV/XTVR-CT heat trace cables are constructed with a self-regulating polymeric-fiber heating element, spacer, fluoropolymer inner and outer jacket, tinned-copper braid and nickel-plated 14 AWG copper bus wires.

The following table shows the connection kits can be used with the XTV/XTVR-CT self-regulating heating cables for Class I, Division 1, Groups B, C, D, T3...T2C; Class II/III, Division 1, Groups E, F, G, T3...T2C installations.
