

HMI Automation Pedestal

The HMI Automation Pedestal allows easy access to HMI control panels in process automation, automotive and material handling applications. This pedestal solution is designed to protect controls equipment while allowing users to adjust for ergonomic support and have flexibility to adjust the positioning to get closer to the task at hand.

The HMI Automation Pedestal can be customized with 3 size options of nVent HOFFMAN MAS series enclosures and 2 different sized columns with a concealed raceway for cable protection.

FAST AND EASY ASSEMBLY

Easily assembled and customized to accommodate user preference.

WORK MORE EFFECTIVELY

Pivot bracket provides added ergonomic support allowing the user to adjust the controls to a comfortable setting.

WORK MORE EFFICIENTLY

Optional swivel brings the controls closer to the task with horizontal pivoting.

GLOBAL AVAILABILITY

Ideal for global specifications using universal part numbers.

Enclosures for PLC & HMI panels

Available in 3 sizes:

- **Small** (MAS0404021r5) to accommodate screens up to 10 in.
- **Medium** (MAS0505021r5) to accommodate screens up to 15 in.
- **Large** (MAS0806021r5) to accommodate screens up to 21 in.

Pivot Bracket

- Pivot Bracket (APBRKT44) provides additional ergonomic support and visibility to HMI and PLC panels.
- 7 different tilt settings can be secured into place with locking pins.
- Can be used with or without ASWV44 swivel bracket

Pedestal Column

- Select from two sizes of pedestal columns: 33 inch (A44CCOL-E33) and 44 inch (A44CCOL-E44).
- The pedestal column has a channel cutout and gland plate to allow for cable management and protection to data and power cables.

Pedestal Base

- Base (A18SBASE-LG) is equipped with leveling screws for added stability.
- Holes for bolting to the ground for permanent placement.

Gland Plate for Cable Entry

- Cable Entry gland (CEPR) can be affixed inside of the pivot bracket and allows additional protection for power and data cables.

Swivel Bracket

- Optional Swivel Bracket (ASWV44) provides an easy way to rotate the HMI enclosure into a convenient operating position.
- Swivel bracket can be rotated with 350 degree rotation and can be locked into position with a set screw.
