

Design to Manufacturing Software

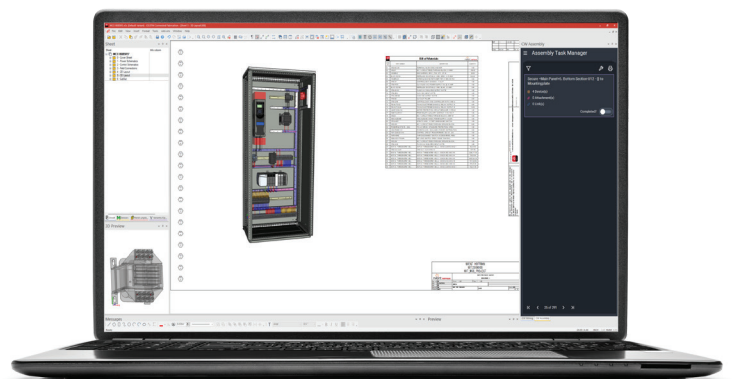

DTM Connected Worker – Assembly

DTM Connected Worker Software simplifies enclosure wiring, assembly, and testing work on the manufacturing floor.

DTM Connected Worker Assembly Package:

- Provides detailed assembly instruction using the engineering data completed in the design phase.
- Streamline shop floor operations by guiding technicians through a task-driven build sequence. With access to specs, manuals, videos, and change order tracking, both new and experienced workers can improve efficiency and accuracy. A digital twin ensures proper assembly steps, enhancing the overall quality of panel builds.

Available DTM Software packages: Professional, Premium, Connected Worker – Wiring, and **Connected Worker – Assembly**
