

nVent CADDY Prefab Rod Lock Strut Assemblies

Features Guide

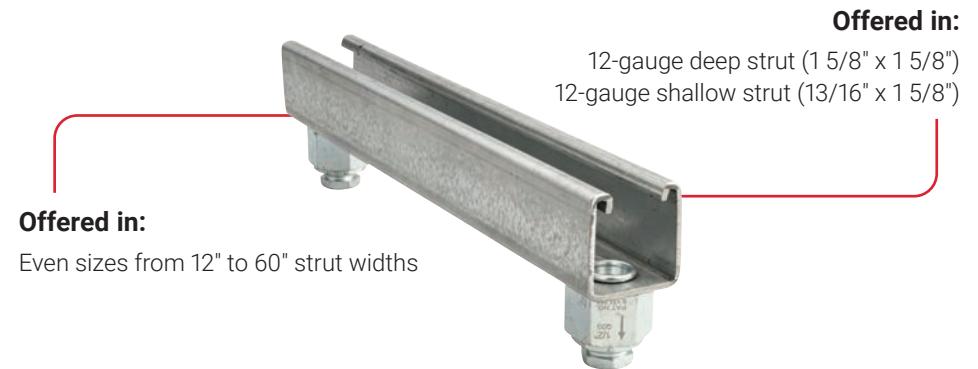

Save time, improve productivity and achieve peace of mind with nVent CADDY Prefab Rod Lock Strut Assemblies. Increase efficiency by removing lengthy fabrication times and maximize safety with less time spent on the ladder.

Step-by-Step Process

1. Identify and supply the trapeze schedule for the project
2. Reach out to your nVent CADDY Regional Sales Manager to request your customized project
3. We will provide you with a quote in 3 – 5 business days
4. Once you receive the order quote, nVent CADDY supplies a Welcome Package with submittals and drawings of supplied nVent CADDY Prefab Rod Lock Strut Assemblies
5. Ready to ship!

Reminders

- Be specific with schedule call outs: T-Rod size and quantity, overall strut width, strut profiles and total quantity needed

Work Smarter on the job:

SAFE

- Reduce risk with less time spent on elevated surfaces
- Avoid fabrication hazards and time spent handling trapeze on the job

FAST

- nVent CADDY Rod Lock Push-to-Install technology allows you to simply push up and lock into place
- Increase productivity efficiency and reduce time spent on un-skilled tasks

EASY

- Cost effective alternative to traditional prefabrication process with less parts and reduced labor
- We ship what you need, when you need it
