

nVent CADDY Telescoping Recessed Light Mounting Bracket

The nVent CADDY Telescoping Recessed Light Mounting Bracket is an adjustable and flexible solution for installing heavy-duty, commercial recessed lights, such as canned lights, wafer lights, puck lights, and more. The Telescoping Recessed Light Mounting Bracket is engineered for both hard lid ceiling and T-Grid applications. The pre-marked scorelines allow for pinpoint accuracy of light placement within the Telescoping Recessed Light Mounting Bracket. Cutting the Center Plate rings is easy and safe—leaving behind no burrs or sharp edges that could produce small injuries or potentially damage the light.

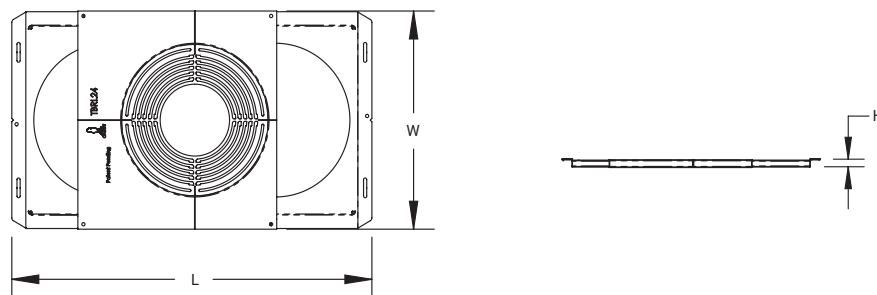

At nVent CADDY, we are committed to creating products that save time and keep contractors Working Smarter and safer on the job. Due to the design and convenience of the telescoping feature, wiring the light is simple and quick—ensuring less time is spent overhead on a ladder.
