

MT02 konisk pinnbult, hane

The nVent LENTON Ultimate MT02 Male Taper Stud is designed for high performance applications, efficiently creating mechanical reinforcing bar connections. The LENTON self-aligning taper-thread reduces misalignment issues and helps eliminate cross-threading during installation. The MT02 Male Taper Stud is used in conjunction with the nVent LENTON Ultimate FT02 Female Standard Coupler for bar-to-bar connections, and the nVent LENTON Ultimate PM09 Female Position Assembly for position/caging connections.

Additionally, the MT02 Male Taper Stud can be used in High Cycle Fatigue applications and exceeds BS 8597 performance requirements with BS 4449 grades B500 B and C reinforcing bar. Contact your nVent LENTON representative for more information.

DESIGN

Monteras snabbt och enkelt

Utilizes the standard nVent LENTON taper profile

No special tools or skills required
