

Varistar LHX+ 45 / RackCHiller In-Row 45 Condensate Drain

Data Solutions

For facilities which operate at low chilled water temperatures, there is an increased risk of condensation. The condensate water will drip into the condensate tray where it will be collected. This kit enables the device to remove the condensate water into a condensate management plumbing network.

The kit is meant for installations with a condensate water plumbing overhead of the cooler. It transports the water with the help of a pump above the level of the condensate tray.

功能

为在冷却水低温条件下运行的设施提供冷凝水管理功能

冷凝水托盘/冷却器底部面板所收集的冷凝水将被排出

即使在安装冷却器后，也可以进行改装
