Floor Standing Enclosures
Product Development Drivers

01
PROVEN LOADING
CAPACITY

nVent HOFFMAN has tested all enclosure's panels in a third party lab.

03
HIGH LEVEL OF
PROTECTION

nVent HOFFMAN provides a reliable design for its enclosures, locating its locking system and fixation points outside the gasket protected area.

02
ONE MAN
INSTALLATION

Use the side panel as an example. One man installation is what drives our product development. Another example is the mounting plate retainer on the mounting plate bracket.

04
HIGH RIGIDITY

A strong profile design, an innovative 'S' bend, and a significant increase in material thickness are the characteristics that define the most recent side panels from nVent HOFFMAN. And to make installation fast and easy, nVent HOFFMAN's customers also benefit from a smart hanging design feature, that allows the side panels to be hung from the enclosure using a unique bend across the top edge of the side panel.

Floor Standing | Mild Steel Range

The enclosures in the floor standing mild steel range, with single or double door versions, are epoxy-polyester coated in light grey, RAL 7035. Corrosion resistance is guaranteed thanks to internally conducted salt spray tests, which follow the standard ASTM B117:11.

These enclosures are typically used for indoor applications, such as machine control panels, automation and control of manufacturing lines, or for power and distribution panels.

The welded frame in each enclosure makes it strong and rigid and well suited for heavy duty applications. A wide range of accessories are available to allow for many different configurations. The same accessories may be used on all enclosure versions, since all enclosures are designed around the same platform. This makes engineering easier and allows for stock reduction with panel builders and distributors. The assembly of the enclosures and accessories is easy, which contributes to reduced assembly time and increased competitiveness.

This enclosure range has been designed to comply with the relevant standard for empty enclosures, IEC 62208. Maximum protection for the user and the equipment is achieved thanks to high protection degrees, IP 55 according to IEC 60529.

The main features of each enclosure version in nVent HOFFMAN’s mild steel floor standing range is listed in the table below.

- Material:**
Frame: 1.5 mm painted steel. Door: 2 mm painted steel. Rear, roof and side panels: 1.5 mm painted steel. Mounting plate: 2.5 mm galvanized steel. Bottom plates: 1 mm galvanized steel.
- Frame:**
Seam welded reversed open profiles with 25 mm hole pattern, according to DIN 43660. Including integrated external hole pattern.
- Door:**
Mounted with four hinges allowing left or right hand opening. Including door frame with 25 mm hole pattern.
- Rear panel:**
Fitted by M6 torx screws. Standard facilities for rear door mounting.
- Side panels:**
Supplied as an accessory.
- Roof panel:**
Removable.
- Lock:**
Espagnolette 4-point locking system. Does not interfere with the enclosure inner space. Standard double-bit lock with 3 mm insert.
- Bottom plates:**
Consists of three or four (D>600) pieces.
- Mounting plate:**
Double folded and slides into position. Adjustable in depth by steps of 25 mm, with the MPD02 accessory. Supplied, attached on the outside of the enclosure packaging.
- Earthing:**
All panels are earthed through their fittings and are equipped with a separate earthing stud.
- Finish:**
RAL 7035 structured powder coating.
- Protection:**
Complies with IP 55 (tested by CPRI).
- Mounting requirement:**
Standard delivery ready for combined installation. For stand-alone installation add side panels.
- Delivery, R5 version:**
Frame with fitted door, rear panel, roof panel, bottom plates, mounting plate and door frames. Delivered on a pallet which is identical to the width of the enclosure to allow suiting without removal. Packing material is recyclable.
- Delivery, R501 version:**
Frame with fitted door, rear panel, roof panel, bottom plates and door frames. Delivered on a pallet which is identical to the width of the enclosure to allow suiting without removal. Packing material is recyclable.
- Delivery, R502 version:**
Frame with fitted door, rear door, roof panel, bottom plates, mounting plate and door frames. Delivered on a pallet which is identical to the width of the enclosure to allow suiting without removal. Packing material is recyclable.
- Delivery, R503 version:**
Frame with fitted door, rear door, roof panel, bottom plates and door frames. Delivered on a pallet which is identical to the width of the enclosure to allow suiting without removal. Packing material is recyclable.
- Delivery, R504 version:**
Frame with fitted door, rear door, roof panel, bottom plates, two mounting plates and door frames. Delivered on a pallet which is identical to the width of the enclosure to allow suiting without removal. Packing material is recyclable.
